Work experience

Salesforce Developer

Since September 2021 IlievSoft Plovdiv, Bulgaria

• **Lightning Web Components (LWC)**
• Utilized Lightning Web Components (LWC) to build efficient and responsive user interfaces.
• **Apex**
• Developed custom Apex classes and triggers to automate business processes.
• Leveraged **SOQL** for data retrieval and manipulation.
• **Lightning Message Channel and Custom Events**
• Implemented Lightning Message Channel for real-time communication between Lightning components.
• Created custom events to facilitate interaction between components.
• **Salesforce Lightning Design System (SLDS)**
• Designed visually appealing user interfaces using SLDS to maintain consistency and usability.
• **Salesforce Flows**
• Developed and optimized Salesforce Flows to streamline complex business processes.
• Other Technical Skills:
• Data Modeling: Designed and implemented Salesforce data models to ensure data integrity and efficiency.
• Integration: Integrated Salesforce with external systems using REST and SOAP APIs.
• Testing: Conducted unit testing and integration testing for Salesforce components.
• Deployment: Managed deployments and version control using Salesforce DX and Git.

React Developer

Since September 2021 IlievSoft Plovdiv, Bulgaria

IlievSoft is a software company engaged in the development of Web applications.

- Skilled in leveraging **React hooks** to manage **state** and **side effects**.
- Utilized **useState** to handle component-level state, facilitating dynamic data management.
- Effectively employed **useEffect** to manage side effects, such as fetching data and interacting with the DOM.
- Demonstrated expertise in optimizing performance using **useMemo** for memoization and **useCallback** for optimizing function references in React applications.
- Proficient in managing state in React applications using tools such as **createContext** and **useReducer**.
- Developed **custom hooks** to encapsulate complex logic and promote code reusability.
- Extensive experience in styling React components using **Styled Components**, ensuring a clean and maintainable codebase.
- Created visually appealing and responsive user interfaces by leveraging Styled Components.
- Possess an in-depth understanding of **JavaScript promises and callbacks**, fundamental concepts for handling **asynchronous** operations.
- Proficient in utilizing **promises** to manage and control the flow of asynchronous code, ensuring efficient handling of data and error scenarios.
- Extensive experience in working with **callbacks**, allowing for fine-grained control over asynchronous tasks and enabling non-blocking operations in JavaScript applications.

Work experience

Salesforce Developer

From December 2019 to February 2020 ISOBAR Sofia, Bulgaria

Education

Salesforce Platform Developer I

Since September 2023 Certificate obtained from Salesforce

JavaScript Web Developer

From September 2017 to May 2019 Software University Sofia, Bulgaria

ASSOCIATE OF ARTS: GRAPHIC DESIGN

From January 2015 to June 2016
Centre De Formation Professionnelle De Verdun Montreal, Canada
